In the Claim:

Claim 15. Line 6, "a" has been changed to --the-- (note "the back wall of the housing on line 3 of claim 13).

The reference numeral "35" is included in drawing figure 9 of preliminary of June 21, 2006, objection to the drawings regarding not including "a plate of thermally conductive metal inside the housing and in thermal contact with the housing in the office action of February 5, 2008 is therefore withdrawn.

Mohacsi is listed in the attached 892 form as it was inadvertently not included in the previous 892 form of February 5, 2008.

Claim 1 is allowed because the prior art individually or in combination does not teach the combination of an underwater lighting unit comprising an array of light emitting diodes mounted against a wall of a thermally conductive housing, a clear transparent material collimator in front of each of the diodes, a transparent screen aligned across front faces of the collimators and in contact with the front faces and the transparent screen being sealingly edge mounted in a peripheral recess around walls of the housing with at least a portion of the walls of the housing being in direct heat exchange contact with water in which the lighting unit is submerged. Claims 2 to 10 further limit claim 1 and as such are also allowed.

Claim 11 is allowed because the prior art individually or in combination does not teach the combination of an underwater lighting unit comprising an array of light emitting diodes mounted against a wall of a thermally conductive housing, a conical or pyramidal clear transparent material collimator in front of each of the diodes, a transparent screen aligned across front faces of the collimators and in contact with the front faces and the transparent screen being sealingly edge mounted in a peripheral recess around side wall or walls of the housing with at least a portion of the walls of the housing being in direct heat exchange contact with water in

which the lighting unit is submerged. Claims 12 to 17 further limit claim 11 and as such are also allowed.

Claim 18 is allowed because the prior art individually or in combination does not teach the combination of an underwater lighting unit comprising an array of light emitting diodes mounted against a wall of a thermally conductive housing, a clear transparent material collimator in front of each of the diodes, a transparent screen aligned across front faces of the collimators and being sealingly edge mounted in a peripheral recess around side wall or walls of the housing with at least a portion of the walls of the housing being in direct heat exchange contact with water in which the lighting unit is submerged. Claims 19 and 20 depend on allowed claim 18 and as such are also allowed.
